Reservoir engineering is a branch of petroleum engineering that applies scientific principles to the fluid flow through porous medium during the development and ...In this reservoir engineering course important concepts that will be covered include the reservoir life cycle, reservoir environment and formation properties, Darcy ...Reservoir simulation is an area of reservoir engineering in which computer models are used to predict the flow of fluids (typically, oil, water, and gas) through ...Abstract Deconvolution transforms variable rate pressure data into a constant rate initial drawdown with a duration equal to the total duration of the test. It yields ...
